SPACE APPS 2021

ISABELA CLEMENTINO PONCIANO FERREIRA - BRAZIL

How about hop upon an adventure?

LET'S GO!

DO YOU THINK YOU
CAN HANDLE IT?

You finally got the
chance of your life!

Could you
survive in space?

Why not learning
while you're
playing?

5 Hazards of Human Spaceflight Videos

A human journey to Mars, at first glance, offers an inexhaustible amount of complexities. To bring a mission to the Red Planet from fiction to fact, NASA's Human Research Program has organized hazards astronauts will encounter on a continual basis into five classifications. In the next month, each of the Hazards will be addressed in depth with supportive video and podcast content. The Hazards will be investigated as follows.

Hazard 1: Radiation
Hazard 2: Isolation
Hazard 3: Distance
Hazard 4: Gravity Fields
Hazard 5: Hostile/ Closed Environments

Pooling the challenges into categories allows for an organized effort to overcome the obstacles that lay before such a mission.

One Hazard Explored: One Step Closer to Mars
